Built for you. Built for Life[®].

Bring new life to your home with beautiful windows and doors made with the strength of Ultrex[®] fiberglass. Built to last and backed by our Limited Lifetime Warranty.

“We only partner with local experts who know your community, climate, and other essentials. And we back it up with advanced building materials and design details that endure the test of time. Because some decisions should only be made once.”

Dan Marvin
President — Infinity from Marvin

OUR PARTNERS

We only partner with local experts

Hand selected

Infinity from Marvin hand-selects our independent retail partners for their decades of experience and service in your local community.

Family values

Many of our partners are small and family-run businesses that give back to their communities. Your satisfaction is vital to the success of their business.

Expert guidance

Infinity's partners understand your unique local codes, climate considerations, and installation needs.

"I'm glad I'm part of that Marvin family, because that's how they treated you. They treated you like part of the family. From start to finish. I'm so glad I purchased Infinity from Marvin."

Michael T.

Terms and Definitions

Frame

Stationary portion of a window or door with three components: header across the top, jambs down each side, and sill across the bottom.

Lite

Each area of glass is called a lite, and Infinity offers divided lite patterns to match the look of your home.

Panels

The operating and/or stationary portion of the door that holds the glass and is separate from the frame.

Rail

The horizontal part of a sash, door panel, or screen.

Sash

The operating and/or stationary portion of the window that holds the glass and is separate from the frame.

Stile

The upright or vertical members of the framework of a sash, door, screen, or other panel assembly.

Infinity from Marvin streamlines your replacement project — from start to finish

1. Expert consultation

An Infinity expert will provide a complete consultation to determine your specific needs — including climate considerations and other factors. They will answer all your questions and provide a detailed, custom project quote based on your specifications.

2. A perfect fit

A measure technician will review your order, measure your openings, and verify your installation needs. Your windows will then be built to your exact needs and specifications.

3. Seamless installation

Installation professionals will remove and dispose of your old windows and replace them with your custom Infinity windows.

4. Built for Life®

From our Limited Lifetime Warranty to our partners' unparalleled customer service, we go above and beyond to ensure your windows provide a lifetime of optimal performance.

Infinity uses fiberglass for unmatched performance.

Replacement windows and doors have always been our sole focus. And that means we pioneered the use of materials like fiberglass that simply outperform and outlast other options. However, Infinity goes even further with Ultrex® — our proprietary fiberglass solution that offers unsurpassed durability and timeless style.

COMPARE INFINITY	VINYL	VINYL/WOOD COMPOSITES (FIBREX®)	INFINITY ULTREX FIBERGLASS	WHY INFINITY?
DURABILITY	BASIC	BETTER	BEST	Infinity's acrylic finish is 3x thicker than the competition and resists scratches, fading, and chalking.
STABILITY	BASIC	BETTER	BEST	Ultrex's low expansion rate means our windows stay tight and true for a weathertight seal.
STRENGTH	BASIC	BETTER	BEST	Ultrex is 8x stronger than vinyl and 3x stronger than Fibrex.

How Ultrex fiberglass measures up

We created Ultrex with one goal in mind: develop the most durable window material in the industry. It's not only 8x stronger than vinyl – it resists expanding and contracting in any climate. So you get a tight, snug fit that will last.

PERFORMANCE

A fit that never quits

Ultrex fiberglass expands at virtually the same rate as glass, so our windows stay tight and true. This makes Infinity windows resistant to leaks, seal failures, and stress cracks that can compromise energy efficiency and long-term performance.

STRENGTH

Stands up to the pressure

Compared to other materials, Ultrex is the strongest window framing material in the replacement industry. This means Ultrex resists bending and flexing – that's confidence Fibrex and vinyl simply can't match.

01

Ultrex vs. Vinyl Windows

Vinyl can warp and shift under everyday conditions – potentially making vinyl windows difficult to open and close and affecting their all-around performance. Ultrex resists sticking, swelling, and warping so Infinity windows and doors will continue to easily open and close.

02

Ultrex vs. Wood Windows

Wood windows offer classic beauty that, depending on the environment, can require maintenance and care. Infinity windows built with Ultrex capture the beautiful details and profiles of wood – without the maintenance.

Ultrex is stable like the glass in your window

Vinyl expands at a much higher rate than glass which may compromise your window's performance.

Ultrex is 8x stronger than vinyl

Ultrex offers superior bend and flex resistance to protect the integrity of your home.

Timeless design with an attention to detail

Ultrex® fiberglass not only provides unmatched durability compared to other window replacement materials — it also makes a lasting impression both inside and out. From slimmer profiles that deliver bigger views and more daylight to color options that resist fading, Ultrex simply delivers.

More view for your money

Because Ultrex is so strong, we actually use less of it in Infinity window frames. That means you get more daylight and greater views outside, without bulky frames getting in the way.

ULTREX

VINYL

Beauty that lasts

Infinity's proprietary, high-performance, co-extruded finishing process is unlike anything else in the industry. Our thick, even acrylic finish is free of pinholes, striations, and imperfections and will resist scratches, fading, and chalking to retain its original beauty.

ULTREX

COMPETITOR

A finish that resists fading

Want long-term color retention in a variety of styles? Ultrex uses an acrylic finish that is fade-resistant and virtually maintenance-free.

With a finish that's 3x thicker than competitive options, Ultrex resists chipping, denting, or peeling.

ULTREX

COMPETITOR

Energy Efficiency

Replacing your windows can help reduce utility bills and improve your home's comfort. Ultrex fiberglass is far less thermally conductive than aluminum (5000x less) and insulates much like wood. This means that Ultrex provides an insulating barrier against extreme weather temperatures, keeping your home comfortable and helping to reduce heating and cooling costs.¹

61-68.5%

Average investment recovered on new windows and doors when selling your home.²

SUSTAINABLE DESIGN

An investment that pays

Infinity window and door ratings are certified by the National Fenestration Rating Council (NFRC). NFRC-certified products are independently tested, certified, and labeled to help you make the best purchase decision for your home.

ENERGY STAR

Infinity products are ENERGY STAR® certified.³ ENERGY STAR certified windows can help save on energy bills when replacing existing single pane.¹

Longer life expectancy

Fiberglass windows have a **longer useful life expectancy** than vinyl.⁴ That means fiberglass not only delivers superior performance, but long-lasting durability as well.

1. Savings reflects installing ENERGY STAR certified products compared to non-certified when replacing single pane windows based on the average savings among homes in modeled cities. Actual savings will vary by product type, location, method of installation, individual home characteristics, local climate and conditions, utility rates and other factors. https://www.energystar.gov/products/res_windows_doors_skylights. See your local Infinity partner to learn more about energy efficiency in your climate.

2. "2023 Cost vs Value Report" Remodeling, <http://remodeling.hw.net/cost-vs-value/2023>

3. ENERGY STAR at energystar.gov

4. "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

WINDOW INSTALLATION OPTIONS

Creating the best fit for your home

Depending on the age and style of your home, Infinity offers two window replacement methods. Your local Infinity partner will help you determine the best solution for your home. Both methods are designed for maximum efficiency and minimal disruption to your home.

01

Full-frame replacement

During a full-frame installation project, the entire window and trim is removed and replaced. Full-frame replacement is also used for new window styles or enlarging your existing opening for a bigger view.

02

Insert replacement

Insert replacement is an efficient approach if your existing window frames are in good condition and you only need to replace your sash and hardware. Our insert solution installs directly into your existing window frame with no disruption to existing trim, interior walls, or exterior siding.

Infinity Double Hung Windows in Stone White interior with White hardware

Double Hung, Single Hung, and Single Hung Round Top

Double Hung

The Infinity Double Hung Window is designed with timeless style and modern performance. Both the top and bottom sashes slide up and down, allowing a cool breeze to come in through the bottom while the warm air leaves out of the top.

Single Hung

The Infinity Single Hung offers the same great performance and classic style as the Infinity Double Hung, only with a fixed top sash.

Single Hung Round Top

Preserve or transform the style of your home with Infinity's Single Hung Round Top. Seamlessly enjoy the beauty of a round top with effortless sliding operation.

Cleaning made easy

- 01 Unlock and raise the sash slightly.
- 02 Press the tilt release button and slide the lock lever over the button.
- 03 Tilt the sash into the room for easy cleaning without screen removal.

Infinity Slider Window in Bronze interior with Matte Black hardware

Slider

Slider or Glider

The Infinity Slider (also commonly referred to as a glider) is the perfect option if your existing glider refuses to “slide” open or you have a space where a swinging sash would get in the way.

Whether installed in your family room or on a four-season porch, the Infinity Slider’s smooth sash rollers let you easily open it to invite a breeze into your home.

Cleaning made easy

Cleaning the Infinity Slider is easy with our tilt latch. Simply slide the sash open, operate the tilt latch, remove, clean, and reinsert.

Infinity Casement Windows in Stone White interior with Brass hardware

Casement and Awning

Casement

The Infinity Casement is a side hinged window that swings from left or right. Smoothly crank the Infinity Casement out with our folding handle that tucks out of the way of most window treatments for a clean, finished look. Each Infinity Casement features two hinge options for easy cleaning or larger, unobstructed views.

Awning

Awning windows are perfect for tight spaces or placed higher on a wall for additional privacy. The sash swings outward from the bottom so you can enjoy a fresh breeze with great ventilation.

EASY WASH HINGE

CLEAR VIEW HINGE¹

Casement hinges

The standard Easy Wash® hinge is just that — a design that lets you easily clean the window both inside and out. The optional Clear View® hinge provides an expanded viewing area.

PATIO DOOR INSTALLATION OPTIONS

Rethink your patio door options

Infinity from Marvin focuses on streamlining your door replacement experience from start to finish — all to help you find the perfect sliding, swinging, or folding patio door for your home. Your local Infinity partner will help you determine the best solution for your home.

Full-frame replacement

All doors are installed with full-frame replacements, which requires taking out the existing frame and trim. This door installation method offers the possibility of replacing your existing door with an entirely new style or larger door. With our sizing flexibility, Infinity custom doors fit nearly any size opening in your home.

Infinity uni-directional Bi-Fold Door in Pebble Gray exterior with Satin Nickel hardware

Bi-Fold Door

Unfold new possibilities

Comfortably embrace indoor/outdoor living with the Infinity Bi-Fold Door. The bi-fold door features panels that slide and stack tightly, creating a wide opening to invite fresh air into your home. When completely closed, the panels are weather-tight protecting your home from the elements. Our bi-fold door is designed with narrow profiles to maximize your views and fill your home with light.

With three bi-fold door styles and up to seven panels, your local Infinity partner can help you find the perfect fit for your home. Only Infinity's Bi-Fold Door is built with Ultrex® fiberglass on the exterior and the interior for virtually no-maintenance performance.

MAGNETIC
DOOR CATCH

TWIN BOLT
HANDLE

Fingertip operation

Magnetic door catches come together to protect the panels when open.

Effortlessly rotate the interior twin bolt handle up 180 degrees to unlock and open the door; rotate down to lock and secure.

Bi-fold screen

Infinity's Bi-Fold Door uses a pleated fabric screen that slides open and can be positioned as desired. Bi-parting and uni-directional options are available depending on your configuration. The screen folds tightly to the jamb when not in use for an uninterrupted view outside.

Multiple configurations & style options¹

Infinity bi-parting Bi-Fold Door in EverWood interior and Ebony exterior with Black hardware

EverWood

EverWood, our breakthrough engineered wood grain interior finish, offers natural looks and textures — combined with the durability you expect from Infinity. It looks, feels, paints, and stains like wood but is completely low maintenance.

Match your existing woodwork or take your home in a new design direction with EverWood.

Durable and low maintenance

Long-lasting EverWood is made from an inorganic material, so it won't absorb moisture or decay over time. That means there's virtually no warping, discoloration, material degradation, expansion, or contraction — just remarkably reliable performance and lasting beauty, year after year.

Specialty Glass

Tempered Glass

Increases glass strength to help prevent breakage. This option is ideal for windows that are close to the floor or located in high-traffic areas.

Laminated Glass

Even more durable than tempered glass, laminated glass is often referred to as impact resistant or safety glass due to its vinyl interlayer that tends to remain in place when cracked.

STC/OITC Glass

Sound Transmission Class and Outdoor-Indoor Transmission Class Glass has increased pane thickness, ideal in areas where outside noise is a concern.

California Fire Glass

Available on windows where forest fire codes require one pane to be made from tempered glass.*

*Infinity windows are not fire-rated.

GLAZING OPTIONS

Low E insulating glass coatings

Extremely thin coatings of special low emissivity (Low E) metallic material are applied to glass panes to boost their energy efficiency and block out UV rays. Since glass choice plays a big factor in window and door efficiency, your local Infinity partner can provide recommendations on the best selection for your home.

Low E1

Primarily used in colder climates, Low E1 allows more heat in to warm a room while blocking heat loss.

Low E2

Low E2 offers year-round performance in moderate climates. It helps retain heat in the winter and keep heat out in the summer. It also blocks 84% of the sun's UV rays to reduce fading.

Low E3

Low E3 rejects solar heat while letting light in, resulting in increased performance in climates with intense sun exposure. It also blocks up to 95% of the sun's damaging UV rays.

Low E3/ERS

With an extra metallic layer on the room-side glass to reflect escaping heat back into the room, Low E3/ERS provides maximum efficiency year round in all conditions.
